

## The East High corridor is your connection to Downtown. Let's work together to make it better.

The Market Street/9th Street/East High Street corridors were highlighted in the City Council-adopted Strategic Investment Area (SIA) Plan and have been selected to receive state funding for improvements via VDOT's SMART SCALE prioritization process. This streetscape improvement project represents an important opportunity to enhance alternative modes as well as vehicular travel in the area.

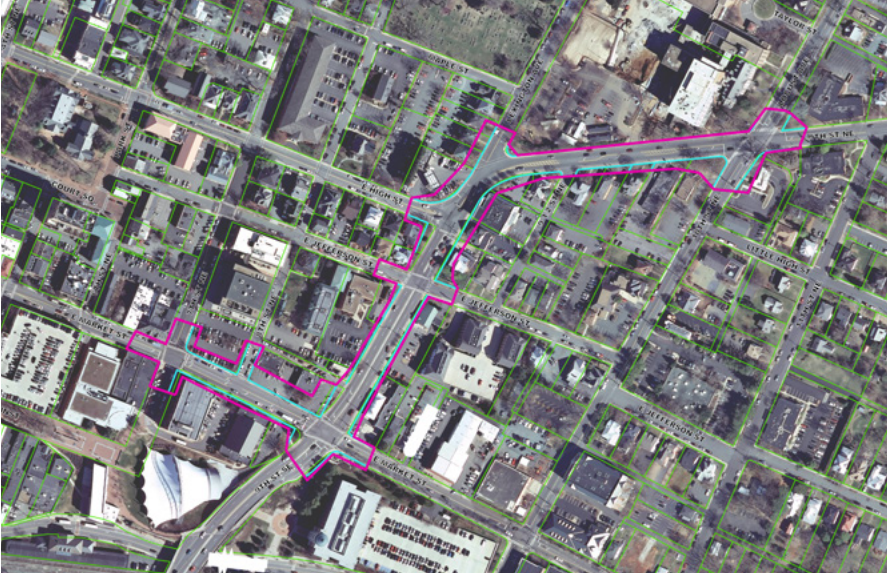

### Project Scope

Streetscape improvements in the area likely will incorporate:

- Wider sidewalks
- Landscaping with street trees
- Intersection improvements for better ADA and pedestrian access
- Bike lanes
- Stormwater quality features
- Improved wayfinding and signage
- Signal upgrades
- Enhanced access to existing transit

Relocation of overhead utilities as well as evaluation of additional bike rack facilities, bike repair stations, and bus stop improvements also will be incorporated.

Relocation of overhead utilities as well as evaluation of additional bike rack facilities, bike repair stations, and bus stop improvements also will be incorporated.

### Project Area

The East High streetscape project includes portions of Market Street, 9th Street, and East High Street.

### Schedule

A preferred design is expected in June 2018. Design approval is expected in summer of 2019 with construction slated to begin in Spring 2020.
